GRADUATION REQUIREMENTS

A minimum of 21 credits is required for graduation for Clermont Northeastern High school. Credits specified by the Clermont Northeastern Board of Education:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4.0</td>
</tr>
<tr>
<td>Mathematics</td>
<td>4.0</td>
</tr>
<tr>

</tr>
<tr>
<td>Total Credits</td>
<td>21.0</td>
</tr>
</tbody>
</table>

Students who complete two seasons of any sport, cheerleading, or marching band may be exempt from Physical Education courses. This does not include Academic Quiz Team. Students must apply for PE exemption through the guidance office and coaches/advisors must confirm students’ participation on designated forms.

Students who attend a Great Oaks Career Development Campus are exempt from the Fine Arts requirement, but still must earn 21 credits to graduate.

Beginning in the 2015-2016 school year, US Government courses will run for a full year and earn 1.0 credit. Financial literacy requirements will be included in this course.

NEW GRADUATION REQUIREMENTS
(beginning with the class of 2018)

The state of Ohio established the following graduation requirements to begin with the class of 2018. In addition to earning the required credits:

- All students take end of course exams:
  - Algebra I and Geometry
  - Biology
  - American History and American Government
  - English 9 and 10

Students in Advanced Placement, International Baccalaureate, or dual enrollment courses in physical science, American History or American Government may take assessments aligned to those courses in place of end-of-course exams to avoid double testing.

Students earn 1 – 5 points for each exam, based on their performance:

- 5 – Advanced
- 4 – Accelerated
- 3 – Proficient
- 2 – Basic
- 1 – Limited

Students must earn at least 18 graduation points on end-of-course tests. The student must earn a minimum of 4 points in Math, 4 points in English, 6 points across Science and Social Studies.

Students who earned High School Credit in any of the above courses before July 1, 2014 automatically will receive 3 points per course test toward the total points needed for graduation.

- Students who do not earn the required number of graduation points can still meet the requirements for a diploma if they:
  - Earn a “remediation-free” score on a nationally recognized college admission exam such as ACT or SAT. The state of Ohio will pay for all students to take the exam free of charge in the fall of their Junior year, starting with the class of 2018.
Earn a State Board of Education-approved, industry recognized credential or a state-issued license for practice in a career and achieve a score that demonstrates workforce readiness and employability on a job skills assessment.

**OHIO GRADUATION TESTS (Classes of 2016 and 2017)**

All students in the classes of 2016 and 2017 must pass all sections of the OGT (reading, writing, mathematics, science and social studies) in order to meet one of the requirements for a high school diploma. A student must retake only the graduation test in the area that has not been passed. The tests will be readministered each year in the fall and the spring.

As of December 2004, according to the Ohio Revised Code Section 3313.615 (A), students may graduate and receive a diploma without passing all five tests of the OGT if they meet all of the following requirements:

- Pass four of the five tests and have missed passing the fifth test by no more than 10 points
- Have had a 97 percent attendance rate through all four years of high school and must not have had an expulsion in high school
- Have a grade point average of 2.5 out of 4.0 in the subject area missed and have completed the curriculum requirement in the subject area missed
- Have participated in any intervention programs offered by the school and must have had a 97 percent attendance rate in any program offered outside the normal school day
- Obtain letters of recommendation from each teacher in the subject area not yet passed, as well as the high school principal

**COLLEGE PREPARATORY REQUIREMENTS**

**CNE Recommended Minimum College Entrance Requirements:** Four-year public colleges and universities advise that students take, at a minimum, all of the following courses to prepare for college.

- Language Arts ...............................................4 credits
- Mathematics (Algebra I, Geometry, Algebra II) .................................................................4 credits
- Science (including Chemistry) ..............................................................................................3 credits
- Social Studies ...................................................3 credits
- Global Language ............................................2-3 credits
- Fine Arts ............................................................1 credit

**GRADING SCALE**

Clermont Northeastern uses the following grading scale:

- 90 – 100 = A
- 80 – 89 = B
- 70 – 79 = C
- 60 – 69 = D
- Below 60 = F

I= Incomplete, Unable to assign grade
P= Pass, no effect on GPA
PEXMPT = Exempt, no effect on GPA
WF= Withdraw failing, no effect on GPA
WP = Withdraw Passing, no effect on GPA

**GRADE POINT AVERAGE & CLASS RANK**

Class rank is based on student grade point average (“GPA”). GPA is based upon (1) semester grades for semester-long courses and (2) final grades for year-long courses. At each semester’s conclusion, students are ranked numerically by GPA. The following scale is used to determine a student’s GPA:

- A=4.0
- B=3.0
- C=2.0
- D=1.0
- F=0

**WEIGHTED COURSES**

Honors A = 4.5 AP and Core Area CCP A = 5.0
- B = 3.5 B = 4.0
- C = 2.5 C = 3.0
- D = 1.5 D = 2.0

Weighted courses add a .5 value to the final average for honors courses and 1.0 for Advanced Placement (AP) and Core Area (Math, Science, Social Studies, English) College Credit Plus (CCP) courses. For example, a student who receives a ‘B’ (3.0) for the final average in an AP or Core Area CCP course would receive an additional weight of 1.0. The final average would be 4.0. A student who receives a ‘B’ (3.0) for the final average in an honors course would receive an
additional weight of .5, resulting in a final average of 3.5.

Weighted courses include:
Honors Geometry A & B
Honors Algebra II A & B
Honors Advanced Math
Honors Trigonometry
Honors Biology A & B
Honors English 9 A & B
Honors English 10 A & B
AP Calculus
AP US History
AP Psychology
AP English Literature
AP English Language
AP US Government
AP Probability and Statistics
AP European History
Any College Credit Plus course within the Core Subject Areas (Math, Science, Social Studies, and English). Courses outside the Core Areas will not receive weighting.

STUDENT COURSE LOAD
The faculty and staff at Clermont Northeastern High School believe that students need to take full advantage of educational opportunities during their high school career. Therefore, all students are required to take a full course load, which involves being enrolled in seven (7) classes for credit every day during grades 9, 10, and 11. Athletes must be scheduled for and pass five (5) credit bearing classes (excluding Physical Education) each quarter to be eligible to participate. If a student fails to pass 5 credits in a quarter, the athlete is ineligible for the entire next quarter. As a reminder, Student Aides do not earn credit toward eligibility or graduation.

STUDENT SCHEDULE CHANGES
Students are encouraged to select their courses carefully in the spring. Students should read descriptions of courses they select and talk with teachers, counselors, and parents to make informed choices.

Courses may be dropped only during the allotted time period at the beginning of school with parent, teacher, and principal approval. If a course is dropped after the time allotted, the student will receive a WF (withdraw failing) in the course for the grading period.

Student changes can be made without a penalty during the allotted time period only under the circumstances listed below:

1) To add a course to meet credit or course requirements for graduation
2) To correct a computer or human error in scheduling
3) To repeat a required course which had been failed the previous year
4) To make a required course level change when teacher, parent, and the counselor agrees it is in the student’s best interest

TRANSFER OF CREDITS
Credits transferred to Clermont Northeastern from another high school will be examined with respect to meeting current graduation requirements.

COLLEGE CREDIT PLUS
Ohio lawmakers established the College Credit Plus (CCP) program in 2014. This effectively replaces the program formerly known as Post-Secondary Education Option Program (PSEOP). CCP enables college-ready students in grades 7-12 to take college courses for which they can earn both high school and college credit.

CCP Objectives:
1) to help students increase their readiness for and access to college
2) to help students decrease the overall cost of their college education
3) to help students decrease the time that it takes to earn their college degree.

There are several requirements for program eligibility and students must make a decision on their intent to participate in this program by March 30 of the preceding school year. There is a mandatory meeting that parents and student attend.

Students who participate in College Credit Plus must also satisfy the Clermont Northeastern Graduation requirements. For CCP participants, selecting classes at the college/university is a function of both the classes required by CNE for high school graduation and the classes required by the college/university for the major they plan to pursue after high school graduation. CCP participants must work with their guidance counselor to determine the former and refer to the appropriate sample pathways to determine the latter.
Below are 15 and 30 hour pathways from some of our partnering Institutions of Higher Education.

Southern State
15-Hour Pathway (Ohio Transfer Module)
COMM 1115 (3)
ENGL 1101 (3)
PSCI 1104 (3)
PSYC 1110 (3)
SOCI 1107 (3)

30-Hour Pathway (Ohio Transfer Module)
Includes the following, in addition to the 15-Hour Pathway:
CHEM 1151/1161 (5)
ENGL 1102 (3)
MATH 1141 (3)
BIOL 1101 (5) or HIST 1110 (4)

To obtain curriculum guides for the majors offered at UC Clermont, please do the following:
1.) Go to www.ucclermont.edu
2.) Click “Academics” (left-hand sidebar)
3.) Select “Associate Degrees” (listed under “Majors & Programs”)
4.) Choose a major(s) listed under either Transition-Oriented Associate Degree Programs or Career-Oriented Associate Degree Programs.
   The former programs enable students to earn an associate’s degree en route to a bachelor’s degree. The latter programs enable students to earn an associate’s degree en route to the workforce.
5.) The overview page for each major includes a link to the major’s ‘curriculum guide’.

To obtain a curriculum guide for the majors offered at all 3 UC campuses, please do the following:
1.) Go to www.uc.edu
2.) Click “Academics” (banner at top of page).
3.) Select “Undergraduate” (listed under “Majors & Programs”)
4.) Scroll down to “Programs by General Interest.” Click a category and then select a major. Note: The overview page for each major includes a link to the major’s ‘curriculum guide’.

Please see the guidance office for more information on CCP. CNE partners with a variety of Institutions of Higher Education including, but not limited to, University of Cincinnati: Clermont College, Chatfield College and Southern State Community College.

ADVANCED PLACEMENT PROGRAM
Advanced Placement (AP) is a program in which high school students can complete college-level curriculum while still in high school. Courses are designed to challenge students, require more work and give students the opportunity for increased academic progress.

In May, students may take the Advanced Placement Examinations. Exams scores are on a 5-point scale:

5=extremely qualified
4=well-qualified
3=qualified
2=possibly qualified
1=no recommendation

Often, participating colleges may grant placement and course credit for a 3 or higher.

HONORS DIPLOMA
The State Board of Education has specific criteria for awarding the Diploma with Honors.

A student who completes the high school Academic Pathway must meet at least seven of the following criteria:

1. Earn four units of English;
2. Earn at least four units of mathematics which shall include algebra I, algebra II, geometry and another higher level course, or a four-year sequence of courses which contains equivalent content;
3. Earn at least four units of science including one unit of physics and one unit of chemistry;
4. Earn four units of social studies;
5. Earn three units of world languages including at least two units in each language studied
6. Earn one unit of fine arts;
7. Maintain an overall high school grade point average of at least 3.5 on a four-point scale up to the last grading period of the senior year;
8. Obtain a composite score of 27 on the ACT or a combined score of 1210 on the SAT verbal and mathematics sections
The student who completes an intensive Career-Technical Education Pathway must meet at least seven of the following eight criteria:

1. Earn four units of English;
2. Earn at least four units of mathematics which shall include algebra I, algebra II, geometry and another higher level course, or a four-year sequence of courses which contains equivalent content;
3. Earn at least four units of science, including two advanced sciences;
4. Earn four units of social studies;
5. Earn four units in a career-technical education program that leads to an industry-recognized credential, results in an apprenticeship or is part of an articulated career pathway, which can lead to post secondary credit.
6. Achieve the proficiency benchmark established for the Ohio Career-Technical Competency Assessment
7. Maintain an overall high school grade point average of at least 3.5 on a 4.0 scale up to the last grading period of the senior year
8. Obtain a composite score of 27 on the ACT or a combined score of 1210 on the SAT verbal and mathematics sections

HONOR ROLL
To be placed on the Honor Roll each quarter, a student must be taking five courses or more, and earn the following:

High Honors: 4.0
Honors: 3.0 – 3.99

HONORS CORDS
Honor cords at graduation are granted based on the cumulative average calculated through the third quarter of the senior year.

Summa Cum Laude (Gold): 3.85 – 4.0
Magna Cum Laude (Blue): 3.65 – 3.84
Cum Laude (White): 3.50 – 3.64

AUDITING COURSES
Students will be permitted to audit Band with the permission of the Principal and Instructor. Students who audit the course are expected to maintain attendance and behavior expectations. Students who audit Band will not receive credit towards their graduation requirements or a grade.

ATHLETIC ELIGIBILITY
Students at CNE must meet eligibility standards set forth by the Ohio High School Athletic Association, in order to participate in athletics.

Athletes must be scheduled for and pass 5 credit bearing classes (excluding PE). This includes any competitive extracurricular activity i.e. Academic Quiz Team. Eligibility is based on quarter grades. If a student fails to pass 5 courses in a quarter, the athlete is ineligible for the entire next quarter.

GREAT OAKS PROGRAM INFORMATION

www.greatoaks.com

Great Oaks Career Campuses offer career-oriented programs to prepare Juniors and Seniors for skilled employment through teaching specialized job skills and related academic studies. Students from Clermont Northeastern most often attend the Live Oaks Campus in Milford. Additional, specialized programs are offered at other campuses.

Please request the Great Oaks Catalog from your counselor for specific programs and entrance requirements, or visit greatoaks.com

Career Technical students are always considered students of Clermont Northeastern. Career Technical students are eligible to participate in all CNE extracurricular activities.

Students must apply during the second semester of the sophomore year. In order to be eligible for admission, the following credits should be completed:

<table>
<thead>

**Agriculture, Food, and Natural Resources**
Prerequisites: None
Grade: 9, 10, 11, 12
Length: 1 year Credit: 1.25
Agriculture, Food, and Natural Resources will teach students how to work in groups and to develop their leadership abilities through hands on activities. Students will use the opportunities the FFA provide for growth and build upon their interpersonal skills. Students will use the animal science unit to promote proper animal husbandry and production to make sound decisions as a producer and consumer. Students will explain and demonstrate the basics in plant production and harvesting in helping make sound decisions as a producer and consumer.

**Animal and Plant Science**
Prerequisites: None
Grade: 9, 10, 11, 12
Length: 1 year Credit: 1.25
Students will apply knowledge of animal and plant science to the agriculture industry. They will be introduced to the value of production animals relative to the agricultural marketplace. Students will engage in animal classification and selection, body systems, along with animal welfare and behavior in relation to the production of animals. Students will learn principles of plant anatomy and physiology, and the role of nutrition, deficiencies and growing environment on plant production. Throughout the course, business principles and professional skills will be examined.

**Livestock Selection, Nutrition, and Management**
Prerequisites: None
Grade: 9, 10, 11, 12
Length: 1 year Credit: 1.25
Students will identify and apply principles and routine husbandry practices to production animal populations. Topics will include principles of nutrition, feed utilization, animal welfare, selection and management of facilities and herd populations. Students will apply knowledge of production animal care to enhance animal growth, selection of breeding stock, and management practices. Throughout the course, students will develop management plans reflecting practices for care and legal compliance.

**Mechanical Principles**
Prerequisites: None
Grade: 9, 10, 11, 12
Length: 1 year Credit: 1.25
Students will engage in the mechanical principles utilized in animal and plant production systems. They will learn electrical theory, design, wiring, hydraulic and pneumatic theory, along with metallurgy in relation to hot and cold metals. Students will apply knowledge of sheet metal fabrication applicable to the agricultural industry along with identify, diagnose, and maintain small air-cooled engines. Throughout the course, students will learn critical components of site and personal safety as well as communication and leadership skills.
Practical Woodworking
Prerequisites: None
Grade: 9, 10, 11, 12
Length: 1 semester Credit: 0.625
Students will learn and develop basic woodworking skills. They will learn how to use and to operate hand and power tools in a lab. The students will use skills to plan and build wood projects. Students also learn safety rules.

ART

<table>
<thead>

</tr>
<tr>
<td>Photography</td>
<td>10, 11, 12</td>
<td>Semester</td>
<td>0.5</td>
<td>Art I</td>
</tr>
</tbody>
</table>

Art I
Prerequisite: None
Grade: 9, 10, 11, 12
Length: Semester Credit: 0.5
Art I looks into the ‘what’ and ‘why’ of visual art. Students explore the underlying visual and conceptual connections that drive our current visual culture. Much emphasis is placed on contemporary art, the value of observation, critical thinking, and discussion. Students will reflect on the visual organization of artwork from the past within a wide variety of cultural frameworks to explore how and why they continue to influence what we see today. These reflections will serve as a basis for their own creative work.

Art II
Prerequisite: Art I, C or higher
Grade: 9, 10, 11, 12
Length: Semester Credit: 0.5
This course will be a continuation of Art I. Students will be creating a variety of artwork, both 2 dimensional and 3 dimensional. Students will be allowed more freedom in their choice of creations. The entire course centers around art making techniques as they relate to contemporary and historical approaches to studio production. Students are expected to maintain a sketchbook outside of class time and participate in class critiques.

Art III
Prerequisite: Art I and Art II, C or higher
Grade: 10, 11, 12
Length: Semester Credit: 0.5
This advanced course will focus on individual concepts and ideas by the student. Students will be creating artwork based on a common theme of his/her choice throughout the semester. A variety of materials will be used during this class. Emphasis is placed on creative ideas and critical thinking as much of this work will be brand new in the student's artistic experience.

Photography
Prerequisite: Art I, C or higher
Grade: 10, 11, 12
Length: Semester Credit: 0.5
Photography is a non-darkroom approach to a time honored tradition and a rapidly advancing medium/profession. This course begins with learning the technical aspects of their camera's functions and controls. We then progresses into creative compositional techniques in framing and manipulating the image. The expressive, formal, and technical qualities of professional work are studied. Digital photo manipulation and retouching are taught as part of this course although it is not necessary to own a digital camera. There will be many projects created in the class and much of the production will occur as homework, outside of the class time. Students need to have a working camera, either digital or film, which
has manual control (see instructor if you have questions). Memory cards and camera cords are expected to be supplied by the student. If using a film camera, the student is expected to pay for development onto a CD (approx. $4 per roll of film).

**Fundamentals of Computer Science**
Prerequisite: None  
Grade: 9, 10, 11, 12  
Length: Semester  
Credit: 0.5  
This course will cover fundamentals of Computer Science through problem solving, understanding data, and looking at new technologies and simple languages to manipulate a robot. Students will explore emerging technologies and their affects on society. This course is intended as a fundamental course that students can take to get a feel for computer science and the technologies that surround them. **Strongly Recommended for all 9th graders.**

**Introduction to Programming**
Prerequisite: Fundamentals of CS  
Grade: 9, 10, 11, 12  
Length: Semester  
Credit: 0.5  
Intro to Programming is a beginner course in computer programming. Students will learn to write and run programs that involve such things as graphics, conditional statements, looping, decision-making, and built-in functions. We will cover these topics using a 3-D animation software (Alice) as well as text base programming. Students will create 3-D animations to demonstrate the programming concepts.
Programming 2
Prerequisite: Fundamentals of CS, Intro to Programming
Grade: 10, 11, 12
Length: Semester Credit: 0.5
This is a programming course which centers around creating applications that have a Graphical User Interface (GUI). This means the students programs will have forms and visual interaction such as games. This class expands on knowledge from Programming 1, using an object-oriented language such as Greenfoot with Java. The final assessment will involve creation of a game.

Web Design
Prerequisite: Fundamentals of CS, Multimedia
Grade: 10, 11, 12
Length: Semester Credit: 0.5
Students will first learn about graphical designs that can be used individually or in a web application. Then students will learn HTML code as well as a web page designer and then continue with advanced web page design (Examples could include style sheets, forms and other types of interactive web design).

Multimedia Design
Prerequisite: Fundamentals of CS
Grade: 9, 10, 11, 12
Length: Semester Credit: 0.5
Students will focus on 4 areas of multimedia presentations (photo-editing, sound editing, animation (such as Flash), and video editing). Each section will teach the basic skills and then focus them on projects that students could do for other classes or for personal use.

Computer Hardware
Prerequisite: Fundamentals of CS
Grade: 9, 10, 11, 12
Length: Semester Credit: 0.5
Focusing on building, fixing and maintaining computers. Students will learn the components of a computer and their function in addition to learning basic to moderate computer troubleshooting skills.

Advanced Computer Hardware
Prerequisites: Fundamentals of CS, Computer Hardware, Teacher Recommendation
Grade: 10, 11, 12
Length: Semester Credit: 0.5
Building on the skills learned in Computer Hardware. A strong desire to major in Computer Science is encouraged. Students will learn advanced troubleshooting skills as well as the specifications for each component of a computer system.

Computer Networking
Prerequisites: 1 full technology credit
Grade Level: 11, 12
Length: Semester Credit: 0.5
Focuses on the communication between computers. Students will learn how to set up home networks.

Yearbook
Prerequisites: Application based, teacher recommendation
Grade: 10, 11, 12
Length: 1 year Credit: 1.0
Yearbook is a year-long course that can be taken as two separate semesters. The purpose of this class is to produce the yearbook for the school while developing necessary business, computer, organizational, and writing skills. Students will learn publishing software and web-based yearbook software that produces an all color yearbook. Students will understand, practice, and learn skills necessary to successfully design and sell advertising. Students will learn the ethical and legal guidelines in creating the yearbook as well. Students will have responsibilities outside of school such as photographing games/events, selling advertisements and actively participating in fund raising events. All assignments,
layouts and responsibilities will be given numerical grades; therefore it is essential that students maintain the duties assigned and mandatory deadlines.

**Evolution of Technology**
Prerequisites: Fundamentals of CS  
Grade: 10, 11, 12  
Length: Semester  
Credit: 0.5  
In the course we will study the evolution of technology in our modern society. Students will learn how many modern technologies function and how to build similar devices using simple machines and electricity. We will explore how to maintain, and build simpler versions of these modern conveniences with the proper application of Science, Technology, Engineering, and Mathematics.

**Robotics**
Prerequisites: teacher recommendation  
Grade: 11, 12  
Length: Semester  
Credit: 0.5  
This is a beginning course in robotics. The objective of this course is to introduce the student to basic programming as well as problem solving strategies. This course will involve students in the development, building and programming of various robots. Students will work hands-on individually and in teams to design, build, program and document their progress. Topics may include motor control, gear ratios, torque, friction, sensors, timing, program loops, logic gates, decision-making, timing sequences, propulsion systems and binary number systems. Student designed robots will be programmed to compete in various courses.

**College Fundamentals of Info Tech (CCP)**
Prerequisites: teacher recommendation  
Grade: 11, 12  
Length: Semester  
Credit: 1.0  
This course is an introduction to the field of Information Technology including technology concepts, terminology, hardware components and software applications. Students will be introduced to and asked to apply basic skills in the core areas of information technology such as programming, database management, networking, systems administration, and web development and the basic research, problem solving and decision making skills required to be successful in this field. The course emphasizes the role of technical communication, project management, languages, tools, models and application architectures within the IT development process. Students who successfully complete the course requirements will earn 3 hours of transcripted credit from UC.

**College Computer Applications (CCP)**
Prerequisites: teacher recommendation  
Grade: 11, 12  
Length: Semester  
Credit: 1.0  
This course covers the use of the microcomputer in a professional environment with a focus on the innovative use of this technology. Students will use decision making tools to assist them in their work or personal environment (including assessing the opportunities and potential issues with the use of technology). The course focuses on technology; history of technology; components of the PC; the Internet; application software including spreadsheet, database, presentation, and Web technologies. Ethical issues are discussed. Students who successfully complete the course requirements will earn 3 hours of transcripted credit from UC.

**CP English 9 A/B**
Prerequisites: None
Grade: 9
Length: 2 semesters Credit: 0.5 for each semester
CP English 9 consists of multiple units from the textbook, and a variety of literature will be integrated as supplements to the units. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards.

**Honors English 9 A/B**
Prerequisites: 
Grade: 9
Length: 2 semesters Credit: 0.5 for each semester
Honors English 9 consists of multiple units from the textbook, and a variety of literature will be integrated as supplements to the units. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards. Honors English 9 will have additional assignments and move at an accelerated pace.

**CP English 10 A/B**
Prerequisites: CP English 9
Grade: 10
Length: 2 semesters Credit: 0.5 for each semester
In CP English 10 Students will follow thematic units throughout the year. Students will be expected to complete assorted writing assignments both inside and outside of class to develop skills of expression. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards.

**Honors English 10 A/B**
Prerequisites: 
Grade: 10
Length: 2 semesters Credit: 0.5 for each semester
In CP English 10 Students will follow thematic units throughout the year. Students will be expected to complete assorted writing assignments both inside and outside of class to develop skills of expression. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards. Honors English 10 will have additional assignments and move at an accelerated pace.

**CP English 11 A/B (American Literature)**
Prerequisites: CP English 10
Grade: 11
Length: 2 semesters Credit: 0.5 for each semester
Students will follow the Common Core Standards for English 11 curriculum through various forms of American Literature as well as one work by Shakespeare. College and career exploration and preparation will be part of the course work as well. Students will continue in the exploration of careers and college preparation in this semester. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards.

**CP English 12 A/B (British and World Literature)**
Prerequisites: CP English 11
Grade: 12
Length: 2 semesters Credit: 0.5 for each semester
Students will be expected to read a large amount and variety of British literature and employ in-depth literary analysis with particular attention to how the structure of a work is used to create meaning. Students will be expected to read out of class both individually and in reading circles. There will also be at least one assigned class novel per quarter. Students will be regularly assessed on their comprehension of all the readings. In addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the benchmarks set forth by the Common Core Standards.

**AP English Language and Composition**
Prerequisites: CP English 10 and Instructor Permission
Grades: 11 and 12
Length: Year Credit: 1.0
This course engages students in becoming skilled readers of prose written for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer’s purpose, audience expectations and subjects as well as how the generic conventions and the resources of language contribute to effectiveness in writing. Much of the class discussion will focus on the author’s technique, meaning and expression of philosophical ideas. Students should expect this course to be similar to an introductory college writing course that focuses on exposition, argument, and literary analysis.

**Journalism**
Prerequisites: Students must have Instructor Permission
Grades: 10, 11, 12
Length: Year Credit: 1.0
Journalism is a year-long course, and students have an obligation to remain in the course for the entire year. This is a co-curricular class, meaning, it will include before or after school, or during homeroom. Students are required to submit one or more articles for each publication. Also, students will be assigned a spread to design the layout for each publication. In addition, students will be required to sell advertisements and participate in fundraisers in order to make the newspaper financially sound.

**Effective Communications A/B**
Prerequisites: English 9
Grades: 10, 11, 12
Length: Semester Credit: 0.5 for each semester
Students may elect to take one or both semesters of Effective Communications, as it is an elective course. The first semester of Effective Communication will explore the history of communications as a field of study, along with the behavioral side of communication such as verbal, nonverbal, relationships, etc. Students will learn sound methods for both interpersonal and intrapersonal communication.

Section 2 will review the history of communications in reference to public speaking and communication technology along with the technical side of communication such as mass media, laws in media and communication, and professions in communication. Students will also be responsible for writing and delivering several different types of speeches throughout the semester.

**Creative Writing**  
Prerequisites: None  
Grades: 10, 11, 12  
Length: Semester Credit: 0.5 for the semester  
The course allows students to experiment with different forms of writing such as poetry, short stories, plays and screenplays. Elements of these genres will be analyzed and discussed. Students will investigate an author’s particular style in depth. The culminating project is a writing portfolio of the student's work.

**English Essentials**  
Prerequisites: Teacher Recommendation  
Grades: 9-12  
Length: Semester Credit: 0.5  
Students who would benefit from additional instruction in basic reading and writing skills will have the opportunity to develop these skills through this course. Enrollment in course is based on teacher recommendation OR can be requested by student if a signature is obtained by current English teacher.

**Young Adult Literature**  
Prerequisites: None  
Grades: 9-12  
Length: Semester Credit: 0.5  
In Young Adult Literature, students will read Young Adult books (literature written for ages 13-18) with an emphasis on current authors. Classes will include reading and writing based on the literature and discussion of common issues and themes young adults face.

**Literature Through Film**  
Prerequisites: None  
Grades: 10-12  
Length: Semester Credit: 0.5  
In this course students will utilize literary terms to analyze various aspects of films. Story-lines will be deconstructed, camera angles will be critiqued, and cinematic techniques will be evaluated. Films will be analyzed in terms of casting, costume, set design, and soundtrack. This course compare and contrast a variety of texts with the film adaption of the title.

**ACT Reading**  
Prerequisites: None  
Grades: 11, 12  
Length: Semester Credit: 0.5  
The ACT Reading course will allow students the opportunity to practice active reading skills that can be utilized on the ACT. Students will examine possible ACT reading passages, questions, and vocabulary. Practice tests will be provided. Students will learn and practice test taking skills along with strategies for taking notes in order to prepare for the ACT and life beyond the ACT.

**AP Literature and Composition**  
Prerequisites: CP English 10, teacher recommendation  
Grades: 11, 12  
Length: 1 year Credit: 0.5
This is a rigorous course of study with a focus on the AP Exam. The exam assesses students’ skills with careful and
critical analysis of imaginative literature. Students will be regularly assessed on their comprehension of all the readings. In
addition to reading, students will develop their writing, listening, viewing, and speaking skills to enhance their knowledge
and practice of the English language arts. All instructional goals of the lessons and evaluations will be consistent with the
benchmarks set forth by the Common Core Standards in addition to the College Board requirements for an AP Literature
and Composition Course.

Transition to High School Math
Prerequisites: Teacher Recommendation
Grade: 9
Length: 2 semesters      Credit: 0.5 for each semester
Transition Math is an introduction to basic algebra concepts and a review of arithmetic algorithms. The course
is designed to help students overcome weakness in preparation in mathematics, emphasizing the concepts
necessary to be successful in Algebra I, Geometry, and Algebra II. The course helps student to develop good
mathematical study skills and learning strategies as an integral part of this course.

CP Algebra I A/B
Prerequisites: None
Grade: 9
Length: 2 semesters      Credit: 0.5 for each semester
Algebra I is a class for most 9th grade math students that covers all the standards necessary for preparing for PARCC
Assessment. Algebra I will cover the following concepts: Number concepts and computation, properties of number
systems, equations, systems, and functions. Algebra I will also cover the following concepts: Inequalities, quadratics,
polynomials, rational expressions, intro to trig, and data.

CP Geometry A/B
Prerequisites: Algebra I
Grade: 9, 10
Length: 2 semesters   Credit: 0.5 for each semester
Geometry is for sophomores and some freshmen and continues the study of algebra and geometry and continues preparation for the State Assessment. Geometry will cover the following topics: vocabulary, angle relationships, polygons, triangles, quadrilaterals, circles, and parallel lines and transversals. Geometry will also cover the following topics: similarity and congruence, right triangles, constructions, areas and volumes, and transformations.

**Honors Geometry A/B**
Prerequisites: Algebra I, and Teacher Recommendation
Grades: 9, 10
Length: 2 semesters   Credit: 0.5 for each semester
This is a course designed for students who are taking the honors level math track including a fifth credit of Calculus. Not only will the class prepare students for the State Assessment but also prepare them for a higher level of math achievement. Honors Geometry will cover the following topics: vocabulary, angle relationships, polygons, triangles, quadrilaterals, circles, and parallel lines and transversals. Honors Geometry will also cover the following topics: similarity and congruence, right triangles, constructions, areas and volumes, and transformations. This course is a weighted course, adding .5 to the weighted GPA.

**CP Algebra II A/B**
Prerequisites: Algebra I and Geometry
Grade: 10, 11
Length: 2 semesters   Credit: 0.5 for each semester
This course is the continuation of the study of algebra. Algebra 2 will cover the following concepts: real numbers, equations and inequalities, systems, matrices, and polynomials and radical expressions. Algebra 2 will also cover the following concepts: rational expressions, functions and relations, quadratic functions, polynomial functions, and exponential and log functions.

**Honors Algebra II A/B**
Prerequisites: Algebra I, Honors Geometry, and Teacher Recommendation
Grade: 10, 11
Length: 2 semesters   Credit: 0.5 for each semester
This course is part of the five-credit math program. Honors Algebra 2 will cover the following concepts: real numbers, equations and inequalities, systems, matrices, functions and relations, and polynomials and radical expressions. Honors Algebra 2 will also cover the following concepts: rational expressions, quadratic functions, polynomial functions, sequences and series, trig functions, and exponential and log functions. This course is a weighted course, adding .5 to the weighted GPA.

**Honors Advanced Math**
Prerequisites: Honors Algebra II, Teacher Recommendation
Grade: 11, 12
Length: Semester   Credit: 0.5
Advanced Math is a review of many important Algebra and Geometry topics that will be carried over into college math classes. Advanced Math will cover the following concepts: functions and graphs, analytic geometry, introduction to calculus concepts, including limits and derivatives, surface area and volume of 3-dimensional figures, and sequences and series. This course is a weighted course, adding .5 to the weighted GPA.

**Honors Trigonometry**
Prerequisites: Honors Algebra II, Teacher Recommendation
Grade: 11, 12
Length: Semester   Credit: 0.5
Trigonometry is offered to those who wish to continue their study of mathematics. It is the study of advanced topics in math with a heavy emphasis on Trigonometry and Analytical Geometry. Trigonometry will cover the following concepts: trig functions and graphs, radian measure, trig identities and equations, polar coordinates, and conic sections. This course is a weighted course, adding .5 to the weighted GPA.
Applied Math
Prerequisites: Algebra II
Grade: 11, 12
Length: Semester Credit: 0.5
Applied math is a class for juniors and seniors who need their 4th credit of math. It uses topics studied in 9th and 10th grade math classes and applies them to real life. This class will be more project based. Applied Math will cover the following concepts: areas, surface areas, volumes, building plans, and mapping/street design, linear or quadratic regressions, and more.

Probability and Statistics
Prerequisites: Algebra II
Grade: 11, 12
Length: Semester Credit: 0.5
Probability and Statistics discusses the ideas behind probabilities and statistics in real life situations. Probability and Statistics will cover the following concepts: basic probabilities, fundamental counting principle, standard deviation, variance, combinations and permutations, expected value, normal distributions, empirical rule, and confidence intervals, hypothesis testing, distributions and distribution testing, and experimental design.

AP Calculus
Prerequisites: Advanced Math and Trigonometry
Grade: 12
Length: Year Credit: 1.0
AP Calculus is a college level course designed for high achieving math students who plan to continue their math studies. Students will have the option to take the AP exam in early May. There is an $80.00 fee for the exam that will be reimbursed with a passing score. AP Calculus will cover the following concepts: functions and their graphs, limits and continuity, derivatives, applications of derivatives, integrals, applications of integrals, transcendental functions, and techniques and applications of integration.

Sports Stats
Prerequisites: None
Grade: 11, 12
Length: Semester Credit: 0.5
Sports Statistics is a class designed for those with a love for sports and numbers. The purpose of the course will be to understand the application of statistical analysis, including advanced sabermetrics, across all major sports with focus on baseball, football, and basketball. In addition, we will learn to use Microsoft Excel for calculation of statistics and analyzing trends graphically over time. Professional sports teams are utilizing advanced statistics to evaluate player and team performance more each day and our goal will be to learn how they are doing it.

ACT Math
Prerequisites: None
Grade: 11, 12
Length: Semester Credit: 0.5
ACT Prep is a junior/senior level class that discusses the topics that are tested on the national test. ACT Prep will help prepare students who are planning on taking the ACT test. Topics are extensions of Algebra 2, Trigonometry, Advanced Math, Probability and Statistics, and even some Geometry.

AP Statistics
Prerequisites: Teacher Recommendation
Grade: 11, 12
Length: Year Credit: 1
AP Statistics is an introductory college-level treatment of experimental design and observational studies, univariate and bivariate data analysis, probability, and inferential methods of drawing conclusions about populations including hypothesis testing and confidence intervals. Students will be expected to exhibit the characteristics of a responsible learner.

**Band**
Prerequisites: None, prior experience in music is helpful
Grades: 9, 10, 11, 12
Length: Year Credit: 1.0
Membership to the CNE Marching Band is open to any student currently enrolled at CNE High School. New band students should notify the director if they wish to join the CNE Band Program. The band is for students who want to be there, and who want to work hard – a positive attitude and excellent attendance are expected of all band members. Attendance at band rehearsals and performances is not optional and will be part of your class grade. All band students must also attend summer band camp. Students who are concerned about work or other commitments should talk to the director before enrolling. Participation is expected of all members at Band Camp, Clermont County Fair Parade, after school practices, football games, additional performances, parades, contests and concerts. See Mr. Moore or the CNE HS Band Handbook for additional information.

**Jazz Band**
Prerequisites: Teacher Recommendation
Grades: 9, 10, 11, 12
Length: Semester Credit: 0.5
Jazz band is an advanced ensemble. All members of jazz band should be able to read music well. Concerts and performances will be held. The band is for students who want to be there, and who want to work hard – a positive attitude and excellent attendance are expected of all band members. Guitar and bass players should discuss their playing ability with Mr. Moore before signing up for jazz band.

**Music Theory**
Prerequisites: None
Grades: 9, 10, 11, 12
Length: Semester Credit: 0.5
Music Theory is an elective course where students will learn to read and write music. Students will learn how to write notes in Bass and Treble Clef, read basic notation using letter names and solfege syllables, common time signatures, basic rhythms, writing major and minor scales, interval relationships and transposition. Students will also learn to analyze and compose music. Students will study major and minor chords, harmonic progressions, rhythmic dictation, melodic dictation, and harmonic dictation.

**Bach to Rock**
Prerequisites: None
Grades: 9, 10, 11, 12
Length: Semester Credit: 0.5
This course is designed to make students more aware of how music has evolved over the last 400 years. Students will learn music fundamentals and terminology to help them better understand music. Through active participation, discussion, recordings, and video, students will better understand and appreciate musical styles and will develop critical listening skills. Career opportunities in the music field will also be explored.
Musical Theatre
Prerequisites: None
Grades: 9, 10, 11, 12
Length: Semester Credit: 0.5
Musical Theatre is a music elective class where students will learn about musical theater and Broadway. This course will cover the elements of theatre, backstage workings, and directing/designing musicals. Students will be responsible for keeping a journal of music examples used in class. One of the major projects of this class is to plan and prepare elements for the spring musical. Painting, organizing and creating set pieces and props. Organizing and maintaining lists and cue sheets.

History of Rock and Roll
Prerequisites: None
Grades: 9, 10, 11, 12
Length: Semester Credit: 0.5
History of Rock and Roll is a music elective class where students will learn about rock and roll music and society. Students will be responsible for keeping a journal of music examples used in class. Students will be presenting material in front of the class regularly.

Mixed Chorus A/B
Prerequisites: None
Grades: 9, 10, 11, 12
Length: 2 Semesters Credit: 0.5 for each semester
Mixed Chorus is a large ensemble in which students sing and perform throughout the school year. A varied repertoire of music representing diverse genres and cultures will be studied and performed. Students learn to respond to the cue of a director. Also students learn to demonstrate technical accuracy, tone quality, articulation and expressions as well as proper posture and breath control that is necessary for the songs performed.

Select Chorus A/B
Prerequisites: Audition-based
Grades: 9, 10, 11, 12
Length: 2 Semesters Credit: 0.5 for each semester
Select Chorus is an auditioned choir in which students sing and perform a difficult level of music repertoire throughout the school year. This choir is designed for students that have a desire to sing and perform more serious repertoire than in Mixed Chorus. select chorus competes and travels. A thorough knowledge of music theory is developed in this class. Students will perform in 4-8 part harmony and will prepare sight-singing exercises to prepare for Ohio Music Educators Association Large Group contest. Choreography is sometimes involved in the music that is performed. A varied repertoire of music representing diverse genres and cultures will be studied and performed. Students learn to respond to the cue of a director. Also students learn to demonstrate technical accuracy, tone quality, articulation and expressions as well as proper posture and breath control that is necessary for the songs performed.

</table>
Students who complete two seasons of any sport, cheerleading, or marching band may be exempt from Physical Education courses. This does not include Academic Quiz Team. Students must apply for PE exemption through the guidance office and coaches/advisors must confirm students’ participation on designated forms.

**Physical Education I**
Prerequisites: None
Grades: 9, 10, 11, 12
Length: 1 semester Credit: 0.25
Students will learn the value of being physically fit and learn to participate in carry-over sports. Activities will be coeducational. Emphasis will be placed upon the development, determination, sportsmanship, skill, attitude, and knowledge. Activities include physical fitness, badminton, volleyball, table tennis, pickle ball, basketball, whiffleball, and scooter hockey.

**Physical Education II**
Prerequisites: PE I
Grades: 9, 10, 11, 12
Length: 1 semester Credit: 0.25
Students will learn the value of being physically fit and learn to participate in carry-over sports. Activities will be coeducational. Emphasis will be placed upon the development, determination, sportsmanship, skill, attitude, and knowledge. Activities include physical fitness, badminton, volleyball, table tennis, pickle ball, basketball, whiffle ball, and scooter hockey.

**Health**
Prerequisites: None
Grades: 9, 10, 11, 12
Length: 1 semester Credit: 0.5
This course of study contains instructional objectives for grades K-High School in accordance with state law. The health areas of concentration for this course are as follows: nutrition, substance use/abuse, disease prevention/control, safety/injury prevention and control, and wellness.

**Lifetime Fitness**
Prerequisites: Completion of 2 PE courses, with a “C” or higher; Or obtained PE exemption
Grades: 10, 11, 12
Length: 1 semester Credit: 0.5
Students will learn the value of being physically fit and learn to participate in carry over sports. Activities will be coeducational. Emphasis will be placed upon development of determination, sportsmanship, skill, attitude, and knowledge. Activities are designed to increase muscular strength, flexibility, and cardiovascular endurance. Many lifetime activities pertaining to lifetime fitness will be used throughout the class. Opportunity is provided for the development of problem solving, self-expression, cooperation, the feeling of belonging, and group consciousness. The value of physical activity and its contribution to a healthful lifestyle is manifested throughout the program.

**Weight Training**
Prerequisites: Completion of 2 PE courses, with a “C” or higher; Or obtained PE exemption
Grades: 10, 11, 12
Length: 1 semester Credit: 0.5
Students will learn weight training techniques and the benefits of a strength-training program.

**Team and Individual Sports**
Prerequisites: Completion of 2 PE courses, with a “C” or higher; Or obtained PE exemption
Grades: 10, 11, 12
Length: Semester Credit: 0.5
This course is designed for students to participate in lifelong physical activities and will be suitable for maintaining a health enhancing level of fitness. The performance standard for these activities is the development of the skills needed to engage in the game/sport/or task successfully. The skills required may not include all possible skills related to the game,
rather those necessary for full participation within the standard rules of the game. In addition, students should show their ability to play strategically, to play in accordance with the most important rules, and to play so that all involved have a positive experience. The activities will include both individual and team sports.

**CP Geophysical Science A/B**
Prerequisites: None
Grade: 9
Length: 2 semesters  Credit: 0.5 for each semester
Geophysical Science is a survey of three major fields of scientific knowledge: Chemistry, Physical Science, and Space Science. While covering these themes, we will also learn about proper methods of experimentation, safe practices in the lab, and strengthening logical reasoning skills.

**Honors Biology A/B**
Prerequisites: None
Grade: 9, 10
Length: 2 semester  Credit: 0.5 for each semester
In Biology, students will explore the field of molecular biology: this includes scientific methodology, biochemistry, characteristics of life, cell structure and function, energy production in the cell, cell division, DNA structure composition and basic genetics. Additionally, students will explore history of life on Earth, evolutionary theory, classification of organisms, population genetics, interspecies and intraspecies relationships, ecosystem dynamics, and biome trends and characteristics. Honors Biology will have additional assignments and move at an accelerated pace.
CP Biology A/B
Prerequisites: None
Grade: 10
Length: 2 semester Credit: 0.5 for each semester
In Biology, students will explore the field of molecular biology: this includes scientific methodology, biochemistry, characteristics of life, cell structure and function, energy production in the cell, cell division, DNA structure composition and basic genetics. Additionally, students will explore history of life on Earth, evolutionary theory, classification of organisms, population genetics, interspecies and intraspecies relationships, ecosystem dynamics, and biome trends and characteristics.

CP Chemistry A/B
Prerequisites: “C” or higher in Biology and Algebra I
Grade: 11, 12
Length: 2 semesters Credit: 0.5 for each semester
Chemistry is the study of matter and the changes that matter undergoes, with emphasis on the composition of matter, atomic theory, periodic law, chemical bonding, formula, writing, and stoichiometry. Time permitting Nuclear Chemistry and/or other topics. Chemistry is recommended for college bound students.

CP Physics
Prerequisites: “C” or higher in Algebra II and Chemistry
Grade: 11, 12
Length: 1 year Credit: 1.0
Physics deals with matter and energy and their transformation, with emphasis on understanding the basic principles of measurements, forces and motion, mechanics, and wave motion. Time permitting Nuclear Physics and/or other topics. Sections must be taken consecutively.

Environmental Science A/B
Prerequisites: Biology
Grade: 11, 12
Length: 2 semesters Credit: 0.5 for each semester
Environmental Science is designed to look at the physical concepts of Earth's environments. Based on physical sciences, this course will cover topics such as management of Earth's systems, atmospheric affects on Earth's surface, meteorology, Earth geologic history, Earth's composition and structure, geological impact on the environment, and human role on the environment. Additionally, students explore ecological concepts of Earth's environments. Based on life sciences, this course will cover topics such as biodiversity, ecosystem dynamics, interdependence of organisms, population dynamics, biogeochemical cycles, pollution and waste management.

CP Anatomy and Physiology A/B
Prerequisites: Biology
Grade: 11, 12
Length: 2 semesters Credit: 0.5 for each semester
Students will explore many different systems of the human body. The units to be covered include but not limited to: Levels of organization, skeletal system, muscular system, the cardiovascular system and the digestive system. Additionally, students explore humans as living organisms. Units to be covered will include but not limited to: Transport, the nervous system, the lymphatic system, the endocrine system, and the heart.

Fundamentals of Astronomy
Prerequisites: Algebra I and Geophysical Science
Grade: 10-12
Length: Semester Credit: 0.5
Take a voyage starting on Spaceship Earth, traveling out through the planets and other bodies in our solar system, and ending up light years away. This course will require students to participate in several night viewings, journaling exercises, and long-term investigation studies. A final project will be required for this course.
Zoology
Prerequisites: Biology
Grade: 11, 12
Length: Semester Credit: 0.5
All beasts, great and small, are the focus of this introduction to zoology course. Beginning with simple creatures such as sea sponges and jellyfish, we climb the evolutionary ladder through the first animals to venture out of the oceans and eventually reaching the biodiversity of animals we find today. Part of this course will include long-term projects, inquiry-based lab exercises, and research projects. This course will require dissections.

Uncovering Science
Prerequisites: Geophysical Science
Grade: 10, 11, 12
Length: 1 year Credit: 1.0
This course is a follow-up to freshmen science. Examine everyday objects such as cars, planes, household products, photocopiers, skyscrapers, boats, and bridges and discover the science hiding within things you see every day! This course will require research projects, inquiry-based lab exercises, and group and individual projects.

Engineer Your World (STEM)
Prerequisites: Algebra I and Geophysical Science or Biology
Grade: 11, 12
Length: 1 year Credit: 1.0
Developed by a team of University of Texas faculty and NASA engineers, Engineer Your World engages students in authentic engineering practices in a project-based environment. Students complete a series of socially relevant design challenges to develop engineering design skills and habits of mind.

Forensic Science
Prerequisites: none
Grade: 11, 12
Length: 1 year Credit: 1.0
This course surveys key topics in forensic science, including the application of the scientific process to forensic analysis, procedures and principles of crime scene investigation, physical and trace evidence, and the law and courtroom procedures from the perspective of the forensic scientist. It has become a comprehensive subject incorporating Biology, Chemistry, Physics, Entomology, Earth Science, Anatomy and Physiology as well as other aspects of Science. Major topics include processing a crime scene, collecting and preserving evidence, identifying types of physical evidence, organic and inorganic analysis of evidence, hair, fibers, and paint, toxicology, arson and explosion investigations, serology, DNA, fingerprints, firearms, and document analysis. virtual and hands-on labs, and analysis of fictional crime scenarios, students learn about forensic tools, technical resources, forming and testing hypotheses, proper data collection, and responsible conclusions.

College Biology I (CCP)
Prerequisites: Biology, Teacher Recommendation
Grade: 11, 12
Length: 1 year Credit: 1.0
This course is designed for Biology majors and students whose programs require a majors' level course in biology. This course introduces the fundamental characteristics of life, from the molecular to the cellular level, with an emphasis on structure-function relationships and placed in an evolutionary context. Topics covered include: chemicals of life, cell biology, bioenergetics, cell cycle, genetics, DNA replication, protein synthesis, and gene regulation. Students who successfully complete the course requirements will earn 3 hours of transcripted credit from UC.

College Anatomy and Physiology (CCP)
Prerequisites: Biology, Teacher Recommendation
Grade: 11, 12
Length: 1 year Credit: 1.0
This is the first course in a two-semester sequence designed to provide in-depth examination of the structure and functions of the human body. This course will cover the basic biochemistry and cell physiology upon which the study of human physiology will be based. It also covers the structure and functions of human tissues, and the Integumentary, Skeletal,
Muscular, Nervous, Special Sensory, and Endocrine Systems. Includes a required laboratory. Does not count toward biology major. Students who successfully complete the course requirements will earn 3 hours of transcripted credit from UC.

**CP World History A/B**
Prerequisites: None
Grade: 9
Length: 2 semesters Credit: 0.5 for each semester
CP World History topics will include the Enlightenment and Revolution, the Industrial Revolution, Imperialism, and World War I. During the 2nd semester of World History, topics will include the Russian Revolution, Rise of Totalitarian leaders, World War II, the Cold War, and the Post-Cold War Era.

**CP American History A/B**
Prerequisites: World History
Grade: 10
Length: 2 semesters Credit: 0.5 for each semester
CP American History will deal with American history from 1877 through the Modern Age. Within the year, students will review historic events, and expand on them by analyzing and explaining the impact or reasons the events made history.

**Psychology**
Prerequisites: World History, American History
Grade: 11, 12
Length: 1 semester Credit: 0.5
Psychology includes units on Introduction to Psychology, Research Methods, Biological Psychology, Sleep and Dreaming, Sensation and Perception, Abnormal Psychology, Developmental Psychology, Learning, Memory, and Thinking.

**Sociology**
Prerequisites: World History, American History  
Grade: 11, 12  
Length: 1 semester  
Credit: 0.5  
This introductory course in sociology presents an overview of the nature and scope of sociology. The class presents significant research and theory in areas such as socialization, group dynamics, gender roles, minority group relations, culture and community studies.

**Government**
Prerequisites: None  
Grade: 11  
Length: Year  
Credit: 1  
Students will study the structures, purposes, and processes of political systems at the local, state, national, and international levels. The role of democracy and the US Constitution will be examined. The rights and responsibilities of American citizens will be studied with an emphasis on the role of individual participation. Students will also learn about economics and meet their financial literacy requirement through this course.

**Current Issues**
Prerequisites: World History, American History  
Grade: 11, 12  
Length: 1 semester  
Credit: 0.5  
Current Issues is designed to study the major events that have affected the world in recent years. This course is devoted to studying the historical origins and development of political and social problems that confront contemporary humanity. Topics covered include terrorism, regional studies, environmental issues, sustainable development and global economic development, and other world issues with emphasis on recent conflicts and current events.

**Advanced Placement Psychology**
Prerequisites: World History, American History, and Teacher Recommendation  
Grade: 11, 12  
Length: 1 year  
Credit: 1.0  
The purpose of the Advanced Placement course in Psychology is to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the empirically-supported psychological facts, research findings, terminology, major figures, and principles in each of the major subfields within psychology. One of the primary objectives of this course is to expose students to all areas of information covered on the AP examination. This course is a weighted course, adding 1.0 to the weighted GPA.

**Advanced Placement US History**
Prerequisites: World History and Teacher Recommendation  
Grade: 11, 12  
Length: 1 year  
Credit: 1.0  
Students will be engaged in a variety of different education techniques, such as evaluation of historical concepts, analysis of historical documents, development of document based questions, and a thorough analysis of American historical events including social, cultural, economic, and political aspects. The objective of this course is for students to develop higher order thinking, writing, and participation skills and to help successfully prepare students for the Advanced Placement United States History exam in May. This course is a weighted course, adding 1.0 to the weighted GPA.

**World Geography**
Prerequisites: none  
Grade: 9-12  
Length: Semester  
Credit: 0.5
This course builds on students’ understanding of geography and spatial thinking. Contemporary issues are explored through the lens of geography. In addition to understanding where physical and cultural features are located and why those features are located as they are, students examine the implications of these spatial arrangements.

Mock Trial
Prerequisites: Teacher Recommendation
Grade: 11, 12
Length: 1 year Credit: 1.0
Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theory. By the end of the course, students will have learned to prepare witnesses, deliver convincing direct examinations, effectively cross-examine witnesses, raise and overcome evidentiary objections, and select the strongest facts to persuasively present to the judge and jury. While classes will include explanatory lectures, the emphasis will be on learning through student exercises and by students observing and analyzing the performances of others. This hands-on course will culminate in two civil mock trials where students will act as an attorney in one of the cases and as a witness or juror in the other.

Pre-1500 World History
Prerequisites: none
Grade: 9-12
Length: Semester Credit: 0.5
This course examines World Studies from the period of 750 B.C. to 1500 A.D. Students will begin with an exploration of the world of antiquity continuing through to what is considered the modern age. This is an integrated study of World History, beginning in Ancient Greece and ending with an examination of global exploration. Students will be able illustrate how historic events are shaped by geographic, social, cultural, economic and political factors over space and time. Students will also develop their understanding of how ideas and events from the past have shaped our world today.

Military History
Prerequisites: World History
Grade: 10, 11, 12
Length: Semester Credit: 0.5
Examine the role of the military and conflict on both the ancient and modern world. Students will research and analyze the strategic, technological, cultural, and political influence of warfare on human history and the development of civilizations from Ancient Greece to the war in Afghanistan. Additionally, this course will debate the many reasons why Military History is the most common theme of modern popular history.

History Through Film
Prerequisites: World History, American History, parent permission for rated “R” movies
Grade: 11, 12
Length: Semester Credit: 0.5
This class will be exploring social studies through film. All of these films will be touching on important concepts such as war, genocide, and revolution. Movies, along with our hands-on activities such as reading, in-class discussion groups, trials, debates, simulations, and guest speakers give students a well-rounded opportunity to discover the world of social sciences. Movies go beyond dry facts and help bring events “alive.”

Career Readiness and Explorations
Prerequisites: none
Grade: 12
Length: Semester Credit: 0.5
The College & Career Success course is focused on helping senior students learn the skills necessary to aid in the smooth transition from high school into the workplace or college life. Students will develop individualized educational/work related goals and objectives, participate in community engagement opportunities, and learn appropriate adult competencies. Highly recommended for ALL Seniors.

AP European History
Prerequisites: Teacher Recommendation
AP European History focuses on developing students' abilities to think conceptually about European history from approximately 1450 to the present and apply historical thinking skills as they learn about the past. Five themes of equal importance – Interaction of Europe and the World, Poverty and Prosperity, Objective Knowledge and Subjective Visions, States and Other Institutions of Power, and Individual and Society – provide areas of historical inquiry for investigation throughout the course. These require students to reason historically about continuity and change over time and make comparisons among various historical developments in different times and places.

**AP US Government and Politics**
Prerequisites: Government, teacher recommendation
Grade: 11, 12
Length: Semester Credit: 0.5
This course includes both the study of general concepts used to interpret U.S. government and politics and the analysis of specific examples. It also requires familiarity with the various institutions, groups, beliefs, and ideas that constitute U.S. government and politics. While there is no single approach that an AP United States Government and Politics course must follow, students should become acquainted with the variety of theoretical perspectives and explanations for various behaviors and outcomes. Certain topics are usually covered in all college courses. This course will examine topics in Constitutional Underpinnings of United States Government, Political Beliefs and Behaviors, Political Parties, Interest Groups, and Mass Media, Institutions of National Government, Public Policy, and Civil Rights and Civil Liberties.

</tbody>
</table>

**Spanish I A/B**
Prerequisites: None
Grades: 9, 10, 11, 12
Length: 2 Semesters Credit: 0.5 for each semester
Spanish I is an introduction to Spanish geared to learners with no prior language experience. The course will cover learning how to talk about yourself, family and friends, preferences, what you have to or are planning to do, basic Spanish grammar (such present tense verb conjugation, adjective agreement), and basic vocabulary such as date, time, weather, clothing, food, school, sports, activities, emotions, descriptions, etc.

**Spanish II A/B**
Prerequisites: Spanish I, C or higher
Grades: 9, 10, 11, 12
Length: 2 semesters Credit: 0.5 for each semester
Spanish 2 is a continuation of Spanish 1. Students will add to knowledge and skills gained in Spanish 1 and increase their fluency in communication. Spanish 2 students will learn how to talk about events in the past and on-going events, give commands, use reflexive verbs, ask for directions, order in a restaurant, tell stories, shop and haggle in a marketplace; use numbers 1-1,000,000, etc. Emphasis on learning decoding skills in reading and language connection.

**Spanish III A/B**
Prerequisites: Spanish II, C or higher
Grades: 10, 11, 12
Length: 2 semesters Credit: 0.5 for each semester
Spanish 3 will complete the grammar/verb conjugation instruction from Spanish 1 and 2. Students will increase the vocabulary knowledge and communication skills acquired in previous levels. Spanish 3 will cover: present and past
subjunctive tenses; imperative tense; future tense; conditional tense; all perfect tenses, use of direct and indirect object pronouns, por vs. para; giving advice; traveling; and a vocabulary on a variety of topics.

**Spanish IV A/B**

Prerequisites: Spanish III, C or Higher
Grades: 11, 12
Length: 2 semesters  Credit: 0.5 for each semester

Students will refine the skills they have acquired in previous classes in order to explore current events and to increase their abilities in Spanish reading and listening comprehension, speaking, and writing. Spanish 4 is an independent study course, usually held at the same time as another level class. Topics for Spanish 4 will be chosen jointly by the instructor and student, but may include novels, short stories, poetry, film, history, mythology, art or popular culture as well as career-centered vocabulary, depending on the future plans and interests of the student.
